MEMORANDUM FOR 502D AIR BASE WING ACTIVITIES AND MISSION PARTNERS

FROM: 502 ABW/CC  
2080 Wilson Way  
Fort Sam Houston TX 78234-1800

SUBJECT: Environmental, Safety, Occupational Health (ESOH), and Risk Management

1. As Commander of Joint Base San Antonio, I am responsible for providing a safe and healthy work environment for all civilian and uniformed personnel. All officers, civilian leaders, and senior non-commissioned officers are expected to lead from the front. It's our job to ensure we provide our personnel with every chance to succeed as we support our nation's war-fighting requirements.
2. The key to our future success will be Warriors making responsible choices. Whether involving people, property, equipment or the environment, promoting the integration of ESOH practices is a way of life. Bottom line – incorporating sound risk management into daily operations, on and off duty, 24/7, 365 days a year will provide the foundation for successful mission accomplishment.
3. If you observe any unsafe behavior or situations you must intervene immediately. All members of the Joint Base San Antonio team have the professional responsibility to take action when the risks of any plan or activity threaten personal safety, well-being of others, or the mission. I want each of you to always strive to be in a position to help your fellow Warrior make the smart decision.
4. Each of you is a vital member of the team, making an important contribution to our nation. I ask that you make a personal commitment to support the principles and practices of safety and risk management. Do your part to protect the environment. Your commitment to these high standards will ensure a successful mission and help prevent loss of critical human and material resources.

  
THERESA C. CARTER  
Brigadier General, USAF  
Commander
