31 July 2017

MEMORANDUM FOR PUBLIC WATER SYSTEM CUSTOMER

FROM: 559 AMDS/SGPB (Bioenvironmental Engineering Flight)

SUBJECT: Supplemental Information Lead and Copper Monitoring Violation

1. On October 31, 2016, The Bioenvironmental Engineering Flight failed to report an address change to the Texas Commission on Environmental Quality (TCEQ) for Lead and Copper sampling 1 June through 30 September 2016.
2. During this period, 30 of 30 samples were collected and all results were within established limits. Your water is safe to drink. The violation was given for an administrative error. This error occurred when the physical address of a facility we sampled was changed. The correct facility was sampled in accordance with our monitoring requirements, but the address did not match what was on file with TCEQ. Therefore a notice of violation was issued.
3. For more information, please contact the Bioenvironmental Engineering Office at 210-671-7061 or email Mr. Christopher Robinson at christopher.j.robinson24.civ@mail.mil. Additional information about drinking water can also be obtained at <http://water.epa.gov/drink/> or by contacting the EPA Safe Drinking Water Hotline at 1-800-426-4791.

CHRISTOPHER ROBINSON, GS-09, USAF  
Program Manager, JBSA Environmental Health Ops
