COMMANDERS'S RISK

REDUCTION TOOLKIT (CRRT)

The Commander's Risk Reduction Toolkit, or CRRT, is a web-based system that helps command teams from the company through the corps level assess unit readiness with reports on suicide, drug and alcohol use, and criminal history.

CRRT provides information on demographics, deployments and health, and it also contains charts showing unit trends such as administrative separations and other risk events.

Interested in CRRT Training?

For training and CRRT assistance, contact your local installation's Risk Reduction Program Coordinator (RRPC).
