

Air Force Civil Engineer Center (AFCEC)
to conduct the
Third Five-Year Review for the Joint Base San Antonio Randolph Sites TS255, LF001, LF002, FT005, and
FT006 and the Second Five-Year Review for Site FT004
in
San Antonio, Bexar County, Texas

AFCEC will conduct the fourth Five-Year Review (FYR) at the Joint Base San Antonio Randolph Sites LF001, LF002, FT005, FT006, and TS255, as well as the third FYR for Site FT004. The purpose of the FYR is to determine if the final remedies for these sites, which consist of land use controls to prevent residential use of the sites, are and will continue to be protective of human health and the environment. The remedies at these sites address soil and groundwater contamination consisting of metals, volatile organic compounds, and polyaromatic hydrocarbons. The review is required by DAFI32-7020_DAFGM2024-01, *Environmental Restoration Program*, to ensure the cleanup continues to protect human health and the environment.

Site histories and previous investigations may be found in the Air Force Administrative Record available at the following website - (<https://ar.afcec-cloud.af.mil/>)

Questions or requests for information can be submitted to:

JBSA-Randolph Public affairs

355 B Street West

JBSA-Randolph, Texas 78150

Phone: 210-652-4410

502ABW.PA.official@us.af.mil

The FYR is scheduled for completion in November 2025.
